Abstract of WO0058304 Sulfonamide derivatives exhibiting matrix metalloprotease inhibiting effects, which are compounds represented by general formula (I), optical isomers thereof, pharmaceutically acceptable salts of both, or hydrates of them: wherein A is a group represented by the general formula (Ia): (wherein R<5> is hydrogen or the like), or the like; R<1> is hydroxyl or the like; R<2> is a single bond, optionally substituted arylene, or optionally substituted heteroarylene; R<3> is a single bond, -CC-, or the like; R<4> is optionally substituted aryl, optionally substituted heteroaryl, or the like; and m is 0 or 1.
